Strength in every story. Hope in every voice

About This Directory

This directory was created by Many Faces of Moebius Syndrome (MFOMS) to help families and professionals locate craniofacial and cleft programs across the United States.

Listings were compiled from publicly available hospital pages, the American Cleft Palate-Craniofacial Association (ACPA) Approved Teams Directory and verified medical centers providing multidisciplinary craniofacial care.

Programs typically include specialists in plastic surgery, ENT, orthodontics, speech therapy, pediatrics, and genetics.

This information is provided as a public resource for awareness and support. Always confirm details directly with providers before seeking medical treatment.

Disclaimer

This directory is provided by Many Faces of Moebius Syndrome (MFOMS) for informational and educational purposes only.

It is not intended to replace medical advice, diagnosis, or treatment. Always consult qualified healthcare professionals regarding any medical concerns or decisions.

MFOMS is an all-volunteer community organization, not a medical provider.

Hospital listings were compiled from publicly available sources and verified directories such as the ACPA Approved Teams list.

Inclusion does not imply endorsement, and the absence of a program does not reflect its quality of care.
